

Our core divisions include:**Automation**
(PLC/HMI/SCADA)**Drives**
(AC/DC)**Electrical Controls****Power & Distribution****Industrial Robotics**

Electrical System Design

Automation & Drive Systems

Panel Design & Fabrication

What we can do for you:

Keep production costs down and improve performance

Integrate systems and equipment for increased efficiency

Reduce downtime and improve system reliability

Upgrade, repair, and extend the life of your equipment

Capture and evaluate key metrics with Operational Equipment Efficiency (OEE)

Premier Automation's technology solutions are industry-specific to increase your uptime, efficiency, and total system performance.

Drives Solutions**Coordinated Drive & Automation Systems****AC Common Buss Coordinated Process Lines****DC Drive Solutions****Regenerative Drive Systems****Power Supplies and Battery Systems****Motion Control Systems****Automation Solutions**

- Migrate your legacy control systems to current technology
- PLC Programming & HMI Development
- Operator and Maintenance control stations & troubleshooting systems
- Software Interfacing between new and old control systems
- Integration and coordination with Drives and other systems

**Improve Your Efficiency**

Each year the industrial market shifts, and manufacturers must adapt to the changing economic landscape. Unplanned downtime, a lack of data and analysis, or outdated equipment can make productivity feel like a steep uphill climb. Now, modern automation technology can eliminate these barriers to make competitive efficiency possible.
