

Our core divisions include:

-  **Electrical System Design**
-  **Automation & Drive Systems**
-  **Panel Design & Fabrication**

What we can do for you:

-  **Keep production costs down and improve performance**
-  **Integrate systems and equipment for increased efficiency**
-  **Reduce downtime and improve system reliability**
-  **Upgrade, repair, and extend the life of your equipment**
-  **Capture and evaluate key metrics with Operational Equipment Efficiency (OEE)**

Premier Automation's technology solutions are industry-specific to increase your uptime, efficiency, and total system performance.

Drives Solutions

-  **Coordinated Drive & Automtion Systems**
-  **AC Common Buss Coordinated Process Lines**
-  **DC Drive Solutions**
-  **Regenerative Drive System**
-  **Power Supplies and Battery Systems**
-  **Motion Control Systems**

Automation Solutions

- Migrate your legacy control systems to current technology
- PLC Programming & HMI Development
- Operator and Maintenance control stations & troubleshooting systems
- Software Interfacing between new and old control systems
- Integration and coordination with Drives and other systems

Robotic Applications

-  **MATERIAL HANDLING**
-  **ASSEMBLY**
-  **PROCESS**
-  **PERIPHERALS**
-  **TRACEABILITY/QUALITY CONTROL**
-  **CUSTOM/PROCESS EQUIPMENT**

IMPROVE YOUR EFFICIENCY

Modern automation technology can eliminate barriers caused by unplanned downtime, a lack of data and analysis, or outdated equipment. We offer custom solutions to keep your business competitive.
