

Our core divisions include:

Automation Drives (AC/DC) Electrical Controls Power & Distribution Industrial Robotics

-  Electrical System Design
-  Automation & Drive Systems
-  Panel Design & Fabrication

What we can do for you:

-  Keep production costs down and improve performance
-  Integrate systems and equipment for increased efficiency
-  Reduce downtime and improve system reliability
-  Upgrade, repair, and extend the life of your equipment
-  Capture and evaluate key metrics with Operational Equipment Efficiency (OEE)

Premier Automation's technology solutions are industry-specific to increase your uptime, efficiency, and total system performance.

Drives Solutions

-  Coordinated Drive & Automation Systems
-  AC Common Buss Coordinated Process Lines
-  DC Drive Solutions
-  Regenerative Drive System
-  Power Supplies and Battery Systems
-  Motion Control Systems

Automation Solutions

- Migrate your legacy control systems to current technology
- PLC Programming & HMI Development
- Operator and Maintenance control stations & troubleshooting systems
- Software Interfacing between new and old control systems
- Integration and coordination with Drives and other systems

Robotic Applications

-  MATERIAL HANDLING
-  COLLABORATIVE
-  ORDER FULFILLMENT
-  AUTONOMOUS MOBILE ROBOTS

IMPROVE YOUR EFFICIENCY

Modern automation technology can eliminate barriers caused by unplanned downtime, a lack of data and analysis, or outdated equipment. We offer custom solutions to keep your business competitive.
