

### Our core divisions include:

-  Electrical System Design
-  Automation & Drive Systems
-  Panel Design & Fabrication

### What we can do for you:

-  Keep production costs down and improve performance
-  Integrate systems and equipment for increased efficiency
-  Reduce downtime and improve system reliability
-  Upgrade, repair, and extend the life of your equipment
-  Capture and evaluate key metrics with Operational Equipment Efficiency (OEE)

Premier Automation's technology solutions are industry-specific to increase your uptime, efficiency, and total system performance.

## Drives Solutions

-  **Coordinated Drive & Automtion Systems**
-  **AC Common Buss Coordinated Process Lines**
-  **DC Drive Solutions**
-  **Regenerative Drive System**
-  **Power Supplies and Battery Systems**
-  **Motion Control Systems**

## Automation Solutions

- Migrate your legacy control systems to current technology
- PLC Programming & HMI Development
- Operator and Maintenance control stations & troubleshooting systems
- Software Interfacing between new and old control systems
- Integration and coordination with Drives and other systems

## Robotic Applications

**MATERIAL HANDLING**

**PROCESS**

**TRACEABILITY/QUALITY CONTROL**

**ASSEMBLY**

**PERIPHERALS**

**CUSTOM/PROCESS EQUIPMENT**

# IMPROVE YOUR EFFICIENCY

Modern automation technology can eliminate barriers caused by unplanned downtime, a lack of data and analysis, or outdated equipment. We offer custom solutions to keep your business competitive.
