

ROBOT PM SERVICE & HEALTH CHECK

KEEP YOUR ROBOTS RUNNING.

"Schedule time for maintenance — **or your equipment will schedule it for you.**"

ON-SITE PREVENTIVE MAINTENANCE FOR INDUSTRIAL ROBOTS

Premier Automation's Robot PM & Health Check is a structured, on-site service visit — performed at your facility by our certified technicians — to inspect, service, and document your robotic systems before small issues become costly unplanned downtime. Every visit is designed to extend equipment life and keep production running on your schedule.

Annual

or semi-annual service intervals tailored to your production needs

On-Site

our technicians come to your facility — no shipping, no downtime in transit

5-Point

structured inspection covering every critical system on your robot

WHY PREMIER AUTOMATION

CERTIFIED EXPERTISE

Our certified technicians are trained in the latest robotic maintenance technologies and best practices across major robot brands.

CUSTOMIZED SCHEDULING

Flexible annual or semi-annual service plans tailored around your production schedule and operational needs.

MINIMAL DISRUPTION

Efficient processes designed to reduce downtime and keep your operations on track during every visit.

COMPREHENSIVE REPORTING

Detailed, metrology-level insights into your robot's performance and health delivered after every visit.

TRUSTED TECHNOLOGY

Partnerships with industry leaders ensure superior, repeatable results every time.

SIEMENS' LARGEST US SI

As Siemens' largest US System Integrator, we bring unmatched resources and engineering depth to every engagement.

WHAT'S INCLUDED IN EVERY VISIT

01

PRECISION GREASE & OIL REPLACEMENT

Using GreaseBots technology, we deliver safe, efficient, and monitored media replacement with minimal downtime. Compatible with most robotic systems and auxiliary-axis positioners.

REDUCES WEAR, ENHANCES EFFICIENCY & EXTENDS COMPONENT LIFE

02

ENCODER & CPU BATTERY REPLACEMENT

Proactive replacement safeguards your robot's software and positional data integrity — preventing data loss and ensuring consistent, reliable performance.

MAINTAINS OPERATIONAL CONTINUITY & PROTECTS CRITICAL SYSTEM DATA

03

CONTROLLER BACKUP & FULL SYSTEM IMAGING

Complete backup of your robot's controller — including programs, I/O structures, and a full memory image — so you're prepared for any unforeseen challenge.

SECURES YOUR DATA & MINIMIZES RECOVERY TIME IN EMERGENCIES

04

PERIPHERAL EQUIPMENT EVALUATION

We inspect and evaluate peripheral equipment — including end-of-arm tooling and welding torches — to ensure proper function and identify wear before it impacts production.

PREVENTS UNEXPECTED FAILURES & MAINTAINS CONSISTENT OUTPUT QUALITY

EVERY VISIT INCLUDES A WRITTEN REPORT

After each PM, you receive a full written assessment of your robot's condition, performance metrics, and any recommended follow-up actions — so your team always knows exactly where things stand.
